

ISP091201-DK Development Kit for BLE Module

In order to assist clients in developing their Bluetooth Smart solutions based on the ISP091201, Insight SiP offers a Sensor Development Kit. Using this development kit, product developers can use a working solution as starting point to develop their own products. Time to market is saved by avoiding starting from a blank sheet of paper.

Ordering Information

The dev kit is available with the following configurations (refer to ISP091201 data sheet):

- **ISP091201-BN-DK**
Compliant with BLE protocol

General Description

This development kit must be implemented together with Nordic Semiconductor kits nRF50 Strater Kit and nRF8001 Development Kit. These kits are not included in Insight SiP Dev Kit and must be purchased separately.

The kit includes:

- One Test board for ISP091201
- 5 sample units ISP091201

Design Service

If a product developer lacks skills in any of the crucial areas to develop a working solution, then Insight SiP can offer custom design services to cover all of the following areas:

- Custom hardware development
- Addition/replacement of different sensors
- Software development
- Custom SiP development
